

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the present application.

LISTING OF CLAIMS

1. (Currently Amended) A wall mount cabinet comprising:

a rear section having a top side, a bottom side and a first side between the top side and the bottom side, the rear section including a cutout extending from the first side along a portion of the top side, wherein the cutout is adapted to receive a plurality of cables; and

a front section hingedly connected to the rear section at a pivot point immediately adjacent the cutout, the front section having a D-ring secured ~~thereon~~ to a back edge of the front section immediately adjacent the pivot point, wherein the D-ring is adapted to enclose the plurality of cables,

wherein the proximity of the pivot point to the cutout and the D-ring ~~allow~~ minimizes movement of the plurality of cables ~~to rotate about the pivot point~~ when the front section of the cabinet is moved from a closed position to an open position.
2. (Currently Amended) The wall mount cabinet of claim 1, further comprising a hinged duct or transition duct positioned immediately adjacent the cutout.
3. (Original) The wall mount cabinet of claim 1, further comprising two side access panels hingedly connected to the front section.

4. (Original) The wall mount cabinet of claim 1, further comprising a front door hingedly connected to the front section, wherein the front door includes a transparent window.

5. (Original) The wall mount cabinet of claim 1, further comprising a rod which maintains the front section in an open position about 90 degrees from the rear section.

6. (Original) The wall mount cabinet of claim 1, wherein the front section includes a slack cable manager secured to a rail mounted therein.

7. (Original) The wall mount cabinet of claim 1, wherein the front section includes a patch panel secured to a rail mounted therein.

8. (Original) The wall mount cabinet of claim 1, wherein the front section includes a horizontal cable manager secured to a rail mounted therein.

9. (Original) The wall mount cabinet of claim 1, wherein the front section includes active equipment secured to a rail mounted therein.

10. (Original) The wall mount cabinet of claim 4, wherein the front section includes a rail mounted therein, the rail is adjustable from adjacent the front door to adjacent the rear section.

11-24. (Cancelled).

25. (New) A wall mount cabinet comprising:

a rear section having a top side, a bottom side and a first side between the top side and the bottom side, the rear section including a cutout extending from the first side along a portion of the top side, wherein the cutout is adapted to receive a plurality of cables; and

a front section hingedly connected to the rear section at a pivot point immediately adjacent the cutout,

wherein the proximity of the pivot point to the cutout minimizes movement of the plurality of cables when the front section of the cabinet is moved from a closed position to an open position.
